Honours Project – Engagement & Process Form (Student-Led)

Student Name: Pupat Suttrasirikul
Supervisor: Chao Li
Project Title: Predicting Intracranial Aneurysm Rupture Risk using Machine Learning: A Comparative Study of Clinical Data and MRI Image-Based Biomarkers

This form is completed at each supervision meeting (4 per semester, 8 total).

- **Student responsibility:** Bring this form to each meeting and make sure your supervisor fill records. Submit the **8 completed form** (all 8 meetings) as Appendix A of your final project submission.
- **Supervisor responsibility:** Tick rubric boxes and add a short comment. Give comments to students.
- Both student and supervisor initial to confirm entry.

Rubric Criteria

- **Commitment & Independence** – consistency of work effort, self-driven progress.
- **Professionalism** – punctuality, reliability, communication, organisation.
- **Engagement with Supervision** – preparation for meetings, responsiveness to feedback.
- **Contribution to Practical Work** – quality of lab/technical effort, creativity, persistence.

Meeting Records

Date and time	Commitment & Independence	Professionalism	Engagement with Supervision	Contribution to Practical Work	Sup. Initials	Stu. Initials
14/04/2026	☐ Poor ☐ Adequate X Excellent	☐ Poor ☐ Adequate X Excellent	☐ Poor ☐ Adequate X Excellent	☐ Poor ☐ Adequate X Excellent	CL	PS

Comments/Guidance from supervisor:

Too many texts in one slide. Put highlights. The research question should be clear and sharp. The conclusion is long. Reduce the title, use more visuals rather than numbers. Findings should have an interpretation.
